

Introducing The AperFix™ System. ACL Fixation In 5 Minutes Or Less.

Secure aperture fixation is now possible in record time. Cayenne Medical has revolutionized ACL reconstruction, giving you outstanding efficacy and a better procedure than ever before. Whether you prefer hamstring or other soft tissue grafts, the innovative AperFix™ System is a complete, yet simple, solution for consistent results.

Here's how the AperFix™ System works: preloaded, disposable handles facilitate single-handed delivery of the femoral and tibial implants. As the graft is inserted, tension is applied to minimize laxity.

The unique AperFix™ System implants are made from PEEK® polyetheretherketone—a material with exceptional strength, rigidity and radiolucency. Engineered specifically for aperture fixation, the implants provide superior pull-out forces and exceptional tendon-bone compression.

So if you're looking for the next generation of ACL reconstruction technology, complete the attached postcard and mail it today. The AperFix™ System addresses many of the challenges you've been facing. And the outcome is always best.

YES! It's Time For A Better Solution!

The Most Advanced ACL Reconstruction Ever

Introducing The AperFix™ System

Fast-forward to the future of ACL reconstruction. The AperFix™ System, in a revolutionary, five-minute surgical procedure, provides active aperture fixation with PEEK® (polyetheretherketone) femoral and tibial implants. The inserter handles facilitate rapid delivery of strong, rigid implants, while simultaneously tensioning the graft to reduce laxity. As never before, the AperFix™ System gives you a complete, yet simple, solution for consistent results using the hamstring and other soft tissue grafts.

The Fix Is In.

Clear The Hurdles Of ACL Reconstruction.

Introducing The AperFix™ System

- **Rigid Fixation** is ensured by repeatable compression of femoral and tibial implants made of polyetheretherketone (PEEK®).
- **Circumferential Aperture Compression** of the graft restores native anatomy.
- **Superior Strength** is demonstrated by exceptionally high pull-out forces.
- **Speed of Fixation** dramatically shortens procedure time.

To learn more about the AperFix™ System, contact Cayenne Medical, the best source in ACL reconstruction. And experience the levels of today's technology. www.cayennemedical.com
